## Animal Cell Model

### Description

---

#### Animal Cell Model

Provides clear depiction of the latest up-to-date information of the delicate and complex structure of the Animal Cell. In addition to the organelle like nucleus, endoplasmatic reticulum, mitochondria, ribosomes, polysomes and Golgi apparatus, the model also shows centrioles, lysosomes and fat vacuoles. For teaching purposes, the components of the cell are very brightly coloured to bring out the high degree of segmentation of a cell. The presentation of the process of extrusion of a Golgi vesicle and pinocytic signs is shown by the cell dynamics. The single piece model is mounted on a stand with base and comes with numbered Key Card.

We are leading manufacturers, suppliers of Animal Cell Model for Biology Lab. Contact us to get high quality Animal Cell Model for Biology Lab for schools, colleges, universities, research labs, laboratories and various industries.
