

Product Code . SEL-MTM-11027

Creep Testing Machine

Description

Creep Testing Machine

Flat specimens made of lead and PE. Specimen cross-section 2x5mm, measured length 25mm. Table unit for the investigation of the creep behaviour of different materials. Position measurement gauge 0...10mm, resolution 0.01mm. Tensile stress range 5...25N/mm².

Experiments above or below room temperature possible with conditioning box

Technical Data:

- Material: lead, PE.
- Cross-section: 2x5mm.
- Measured length: 25mm.
- Tensile stress range: 5...25N/mm².
- Position Measurement.
- Range: 0...10mm.
- Resolution 0.01mm.

We are leading manufacturers, suppliers of Creep Testing Machine for Mechanics Training Models. Contact us to get high quality Creep Testing Machine for Mechanics Training Models for schools, colleges, universities, research labs, laboratories and various industries.
