

Product Code . SEL-MACL-11072

Calibration of Load Cells

Description

Calibration of Load Cells

Here using this setup one can calibrate different types of Load cells. Here simple demonstration setup is provided to experiment with calibration procedure of load cells.

Specifications:-

Common indicator with necessary signal conditioning circuit.

Common Weights: - Max 20 kg in steps of 1kg

Common Mechanical setup to fit various types of load cells.

- Beam Type Load cell- 1 no.
- 'S' Type Load cell - 1 no.
- Compression Type Load cell - 1 no.

Digital Indicator:-

- Least Count: - 0.1 kg
- Digit: - 3 1/2
- Powder coated enclosure.

We are leading manufacturers, suppliers of Calibration of Load Cells for Measurement and Control Lab. Contact us to get high quality Calibration of Load Cells for Measurement and Control Lab for schools, colleges, universities, research labs, laboratories and various industries.
