

**Product Code . SEL-EELE-11078**

## Static Type A.C To D.C Power Supply Panel

### Description

#### Static Type A.C To D.C Power Supply Panel

Cooper wound transformer with stamping for the boost, buck and step down. To increase and decrease the output voltage the auto manual switches are fitted on front panel. It is designed for 3 ph A.C. input 350v to 460v with output of 220v D.C. Working under manual and auto modes. Short circuit and open circuit are protected by fuses and MCB. Voltage and ammeter are fitted on front panel protection from reverse supply due to reverse diode in the circuit. Trolley with MS powder coating is in housed.

We are leading manufacturers, suppliers of Static Type A.C To D.C Power Supply Panel for Electronics Engineering Lab Equipments. Contact us to get high quality Static Type A.C To D.C Power Supply Panel for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
