

Description

Panel For Testing Of Buchloz Relay Setup

The main function of these relays is to detect an abnormal condition in the tank itself only and to the alarm trip signal. These panels are used mostly to test the Buchloz Relays for the durable performance without any fault.

Features:-

- Inbuilt indicator of power on and trip indicator.
 - Gas Actuated Buchloz relay.
- Digital A.C. Ammeter and Digital A.C. Voltmeter.
- Relay with gas compressor available.
 - Both protection circuit and control circuit are in built and duly wired.
 - To perform the experiments the necessary patch chords and terminals are required for the relay.

We are leading manufacturers, suppliers of Panel For Testing Of Buchloz Relay Setup for Electronics Engineering Lab Equipments. Contact us to get high quality Panel For Testing Of Buchloz Relay Setup for Electronics Engineering

Lab Equipments for schools, colleges,
universities, research labs, laboratories
and various industries.

School Educational Instruments,
Hargolal Road, Ambala Cantt, Haryana
