

Product Code . SEL-EELE-11107

Pumping Plant

Description

Pumping Plant

Three pumps take this water and fill a water tower. A sinking pumps in the groundwater and fill a buffer tank. Three solenoid valves placed on the water tower simulates the household consumption with water return to the cover.

The equipment simulates the pumping plant including:

- A well in link with the ground water.
- A buffer tank.
- A water tower.

We are leading manufacturers, suppliers of Pumping Plant for Electronics Engineering Lab Equipments. Contact us to get high quality Pumping Plant for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
