

Description

Microwave Components – Gunn & Klystron Test Bench

These Training Benches are completely self-contained & provide the means to allow students to carry out practical work at extremely low cost. A comprehensive manual containing extensive microwave theory and a progressive series of assignments is supplied with the Trainer.

The equipment consist of:

- A meter, which monitors the detector output.
 - A selection of wave-guide components.
- The power supply for the microwave source.
 - A detector.
 - Wall Chart.
 - Microwave Chart.

Experiments:-

-
- Study & Measurement with Multihole Directional Coupler.
 - Measure the gain of a waveguide Horn Antenna.
 - Study of Magic Tee, Q & Bandwidth Measurement in cavity resonator.

We are leading manufacturers, suppliers of Microwave Components – Gunn & Klystron Test Bench for Electronics Engineering Lab Equipments. Contact us to get high quality Microwave Components – Gunn & Klystron Test Bench for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
