

Product Code . SEL-EELE-11200

Turning Frog (Sound Sensor)

Description

Turning Frog (Sound Sensor)

This robotics initiation kit includes 2 motors with gears to be assembled and a microphone to be used as a sound sensor. This is an interesting robotics kit. The Robot is able to produce sequentially repeated movements when it detects a sound: the frog starts up, moves forward, stops, turns left, stops, turns right and stops. It requires 2 x 1.5V type AA batteries and a 9V battery all sold separately.

Caution: soldering iron required.

We are leading manufacturers, suppliers of Turning Frog (Sound Sensor) for Electronics Engineering Lab Equipments. Contact us to get high quality Turning Frog (Sound Sensor) for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
