

Product Code . SEL-EELE-11257

Basic Electricity Circuit Lab

Description

Basic Electricity Circuit Lab

The whole essential important topics of electrical circuit learning are studied by different modules. All necessary equipments for electric circuit experiments such as power supply, function generator, analog and digital meters are installed on the main unit for the requirement of experiment.

Featured:-

- All supply units are secured with overload protection.
- With one main unit, user can choose the needed modules for different learning topics.
- Ideal for students to learn the design of electrical, electronics and digital logic circuits.
- To learn efficiently, power supply, function generator and measurement unit are all included.

We are leading manufacturers, suppliers of Basic Electricity Circuit Lab for Electronics Engineering Lab Equipments. Contact us to get high quality Basic Electricity Circuit Lab for Electronics

Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
