

Product Code . SEL-EELE-11265

Earth Fault Compensation Unit

Description

Earth Fault Compensation Unit

The unit should be adjusted to variable settings in order to facilitate matching of the earth-fault inductors to the various switching states of the power supply system. Should connect between the neutral line and the earth to compensate the capacitive earth-fault current by selecting the correct inductance.

We are leading manufacturers, suppliers of Earth Fault Compensation Unit for Electronics Engineering Lab Equipments. Contact us to get high quality Earth Fault Compensation Unit for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
