

## Description

---

### **Advanced Three Phase PV On-Grid Training System**

**The System should cover like or  
better than the following:**

- Design and testing of Three phase PV systems with National Grid.
- Measure generated power of Three phase PV systems.
- Electrical installations of Three phase PV systems.
- Determination of the grid-connected inverter efficiency.
- Investigation of response of Three phase PV to mains failure.

We are leading manufacturers, suppliers of Advanced Three Phase PV On-Grid Training System for Electronics Engineering Lab Equipments. Contact us to get high quality Advanced Three Phase PV On-Grid Training System for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
