

Product Code . SEL-EELE-11251

Single Cylinder Two Stroke Petrol Engine Test Rig

Description

Single Cylinder Two Stroke Petrol Engine Test Rig

Test rigs are used to find out the performance of an IC engine. It consists of an IC Engine, dynamometer, fuel measuring, air intake measuring and various other arrangements. They are classified according to cycle, number of cylinders, arrangement of cylinders, fuel used, type of ignition, valve arrangement, cooling system.

Scope of Experimentation:-

- To determine Brake Horse Power.
- To determine fuel consumption.
- To determine specific fuel consumption.
- To determine Brake Thermal Efficiency.

We are leading manufacturers, suppliers of Single Cylinder Two Stroke Petrol Engine Test Rig for

Electronics Engineering Lab Equipments. Contact us to get high quality Single Cylinder Two Stroke Petrol Engine Test Rig for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
