

**Product Code . SEL-EELE-11264**

## **Under Ground Cable Model**

### **Description**

---

#### **Under Ground Cable Model**

#### **Technical Specifications Required:**

- Voltage: 3x 110V; 50/60Hz.
- Current: 1A.
- Three-phase line should be simulation of a high voltage underground cable with different lengths

Resistance per phase: 0,25Ohm 0,75 Ohm.

- Inductance per phase: 6 mH 18 mH.
- Capacity per phase: 2 x 2 $\mu$ F 6 $\mu$ F.
- Max power consumption: 400W.
- Inputs/outputs: 4mm safety sockets.

---

We are leading manufacturers, suppliers of Under Ground Cable Model for Electronics Engineering Lab Equipments. Contact us to get high quality Under Ground Cable Model for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
